Scouting The Shops

with Sally

Nothing is more bare than a cupboard after the Fourth of July. We've looked and we've looked but we can't find a thing that our Aunt Hepzibah and Uncle Josephus left except a can of nutmeg and an empty ginger ale bottle.

Before our relatives all decided to celebrate the Fourth by visiting us, we had a nice array of things. But now only mice and desolation remain.

Our grocery lists this week laid end to end would reach the moon. If you find yourself in the same spot we're in, you might be interested in knowing:

1. That Lucca Ravioli company is selling fresh juice oranges at 5c a dozen.

2. That Robertson Egg store is featuring Hormel's budget ham, 4 slices for 15c.

3. That Edwards Drug store is a convenient place to pick up 5-Rite and King Court soda, ice-cold, 10c.

4. That Bireley's refreshing fruit juices at Farmers Market are only 25c for six bottles—with a free measuring glass to every carton.

5. That Hilltop Lodge serves sandwiches and salads every night and full-course dinners Saturday and Sunday.

6. That Geneva Bakery makes superb old-fashioned banana and strawberry shortcakes.

7. That Westlake Market has ripe red watermelon at lowest market prices.

Leaving the question of food for a moment, Byrne Radio store is offering a honey of a radio for only \$17.95. The year's gayest comedy, "Primrose Path," is playing at the Daly City theatre. Beeson Cleaners will take the Fourth-of-July kinks out of that hat of yours. H. H. Smith specializes in paints.

Stan's Standard Station features free pick-up and delivery service; and Mather Brothers guarantees 30 miles to the gallon in the new Willys.

Yours until the next great and glorious Fourth.

Sally.

10,000 Indians Rally at Arizona Pow-Wow

Ten thousand Indians from 25 tribes gathered at Flagstaff, Arizona, yesterday, for a three-day celebration marking their twelfth annual Southwest All-Indian Pow-Wow. This celebration lasts three days and during this time the Indians are fed free of charge by the business men of Flagstaff. No whites are allowed to take part in any way in the Pow-Wow, which includes Indian dance ceremonies, a rodeo, numerous parades and other attractions. Above are shown a series of typical scenes from the Pow-Wow.

Whist To Benefit Drum Corps Kiddies

Kiddies of the Daly City Juvenile Drill Team and Drum corps will benefit from a whist party scheduled for Tuesday evening at Theatre hall.

Sponsored by Miss Rose, the whist will feature a large cash prize and many other awards. Playing begins at 8:30 p. m. The public is cordially invited.

Mountain Climbers Rest

Years ago Dr. Valentine T. McGillicuddy, Berkeley, Calif., was the first man to climb Harney peak in South Dakota's Black Hills. Now deceased, his ashes will rest on the summit at his own request.

New Telephones for India

New one-piece telephones are being manufactured in mass production in India to replace the old two-piece office models.

LOOK Lady!

with JOSEPHINE HUDDLESTON

For the American homemaker this certainly is a country of trends. First came fruits and vegetables in cans. We hacked them open as best we could with the handiest tool sharp enough to cut through the tin. Then came that revolutionary little gadget—the can opener!

Now we have a new game. The game of "reading the labels" on cans. Although originated and enforced by Uncle Sam, the manufacturers supply the labels needed for playing this game.

All are constructive trends but each requires knowledge of its purpose and how it should be used for happier living.

"Reading the label" is a fascinating game. No longer are we left to our own speculations about the contents of brightly labeled cans. Instead, we simply read the label and know.

Looking behind these new labels for details, we came upon canned corn and found many interesting facts to make our culinary arts more entertaining, successful and, in the end, more economical.

For example: one can of corn had these words printed neatly on the label—"cream style—standard."

Know what that means? Neither did I until I asked.

Here's what I learned. Corn, like dresses, comes in styles. Three of them—cream style, whole grain and corn-on-the-cob.

Cream style corn results from cutting off only the tops of the kernels and scraping the remainder from the cob to give the creamy consistency.

To get whole grain corn, also called whole kernel, the kernels are cut off at the cob, thus most of the juices remain inside the whole kernels. Corn-on-the-cob is exactly what its name implies. There are three grades of cream style and whole grain corn—fancy, extra standard and standard.

Here's how we save money by knowing all this. Whole grain or cream style of corn (in the fancy grade) costs a little more

than standard or extra-standard but it has more eye-appeal when corn is to be served as a side dish.

However, standard corn, the least expensive of all, has just as much flavor and nutritive value for cooking dishes such as soups or puddings.

Extra-standard corn is in between these other two grades in price. It is the most suitable type for casserole recipes, omelets, fritters, and similar dishes.

Now—with this bit of information—join your neighbors and begin playing the "read the label" game. It's the latest trend in happier living and good eating.

Bow and Arrow Hunter

At 30 yards with bow and arrow—too close to be comfortable—Charles ("Tex") Stone of Dallas has bagged one of the largest mountain lions ever killed in Texas. Stone uses the risky, ancient weapon because an arrow, he says, does less damage to museum specimens and that is what he stalks. Tanned, slender, partly bald and 39 years old, Stone estimates he has killed 400 wild animals in Africa, South America, India, Australia, Mexico and the United States since 1920. All were shot at a range of less than 35 yards. He bagged a male mountain lion that weighed 220 pounds in the Fort Davis mountains.

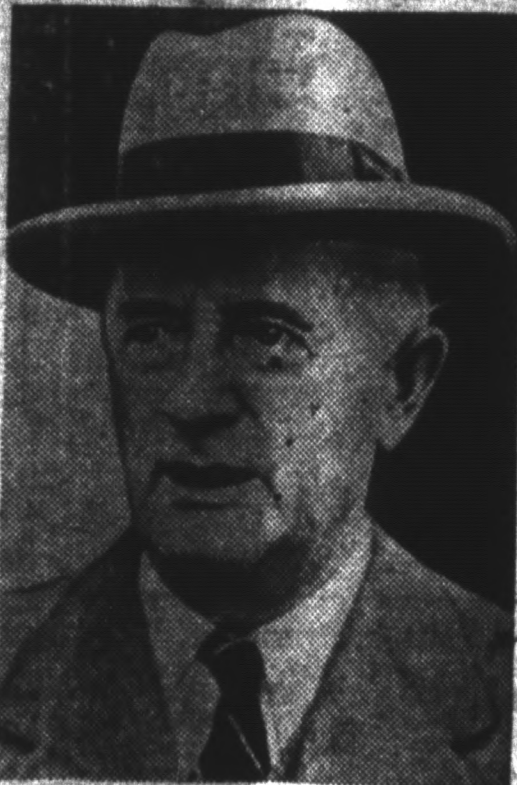

Light Ray Messages

Messages by light rays were described as an almost interception-proof means of communication during warfare by Dr. Phillips Thomas, research engineer of an Indianapolis electric company. The method would be especially effective in communication between the ground and planes in the air, he pointed out, asserting a message could be intercepted only by cutting into the beam directed at the plane. Other electrical developments demonstrated were a "sterilamp" which he explained would destroy all germs in a given confined area, such as a hospital operating room, and a "black light" which produces various colors.

Yacht As 'Oceanographer'

The S. S. Oceanographer is now charting the Nantucket shoals, called the "Graveyard of the Atlantic." The Oceanographer was formerly the private yacht of Morgan, the magnificent. The master suite aboard her, with its extra-sized beds and its mahogany paneling, is used by Commander Frank S. Borden, the Oceanographer's skipper.

Good-by Peabody!

Reverend Endicott Peabody, founder and for 54 years headmaster of Groton school for boys, at Groton, Mass., retired Monday. Over 1,400 graduates have left this exclusive school since its founding and Reverend Peabody has known them all. Included in his imposing list of scholastic "products" is President Franklin Roosevelt, a warm personal friend. Reverend Peabody has often been called "America's Mr. Chips."

Squash Customer

A. C. Cooper donated Cricket, a six-year-old rhinoceros, to the Fort Worth, Texas, zoo. During his first 10 minutes in the "monkey island" colony at the zoo Cricket slapped down seven other monkeys, whipped two raccoons and grabbed three fish from the most surrounding the island.

Paint Helps Sales
Seeking to improve distribution of its open bed springs a firm did them in silver aluminum paint. Sales jumped 25 per cent.

Origin of 'Adirondacks'
The Adirondacks, mountainous district of northern New York, takes its name from the Mohawk word "ratkrontaks," meaning "they eat trees."

Australian Canned Flowers
Dr. J. S. Turner, a professor at the University of Melbourne in Australia, according to the American Magazine, has devised a method of canning flowers.

Long-Run Plays
"Tobacco Road" and "Abie's Irish Rose" are the only two stage plays that have run long enough on Broadway to score as many as 2,000 performances.

Texas Sour Grapes
A single grapevine in Rosebud, Texas, covers the entire side of a building and is half a block long.

'HAREMITE'

Pretty as a picture is Joan Alexander, CBS radio actress, wearing these lovely white "haremite" pajamas. Inspired by the attire of Oriental women, they are cut on generous flowing lines, with very full trousers caught with an elastic at the ankle. A bit of fancy engineering done with zippers and snaps allows you to don it in a jiffy. (Russek's, New York.)

Bullet's Ineffectiveness

The ineffectiveness of bullets shot into water is the result of the absorption of energy by the water. The amount that a lead bullet will flatten on impact with water varies with the striking velocity, the hardness of the lead and the angle of impact.

First Use of Thimbles

Thimbles are said to have been found at Herculaneum and were used by the Chinese at a very early period. Their invention in Europe is traditionally ascribed to Nicholas van Benschoten of Amsterdam in the Seventeenth century.

'Gone With the Wind'

Members of congress have been asked to help suppress the moving picture, "Gone With the Wind." The Malcolm Ammidown Woman's Relief corps, of Southbridge, Mass., wrote to senators and representatives urging the film be banned as "an insult to the Grand Army of the Republic."

Brazil First 'America'

The name America was first applied to central Brazil, in honor of Amerigo Vespucci, who claimed its discovery. It was first applied to the whole known Western world by Mercator, the geographer, in 1538.

Titanic's Memorial

On the banks of the Potomac river in Washington, D. C., stands the Titanic memorial, sculptured by Gertrude Vanderbilt Whitney, in tribute to the men who responded with their lives to the cry of "Women and children first" on board the sinking Titanic. It was donated in 1927 by the Women's Titanic Memorial association.

Seventeenth Century Employees

Believing that it was necessary to threaten employees with hunger in order to get more work from them, Dutch and English economic literature in the Seventeenth century stressed the necessity of lowering wages to the minimal level of subsistence, says a study of The Evolution of the Classical Wage Theory, issued by the Columbia University Press.

Poland Still on Map

Although Austria and Czechoslovakia have been rubbed off European maps, United States commercial mapmakers are standing firm on Polish territory. The familiar pink area used to designate the former Republic of Poland will remain unchanged until the war in Europe is over, according to William Tauch, representative of a large map-making concern.

Napoleon's Burial Place

Napoleon III is buried at Farnborough, England. Previously, he was buried in St. Mary's mortuary chapel, Chislehurst, England, where he died, but in 1867 the Empress Eugenie caused to be built St. Michael's Roman Catholic church, in the crypt of which were buried the emperor, the prince imperial and the empress.

Noncompetitive Imports

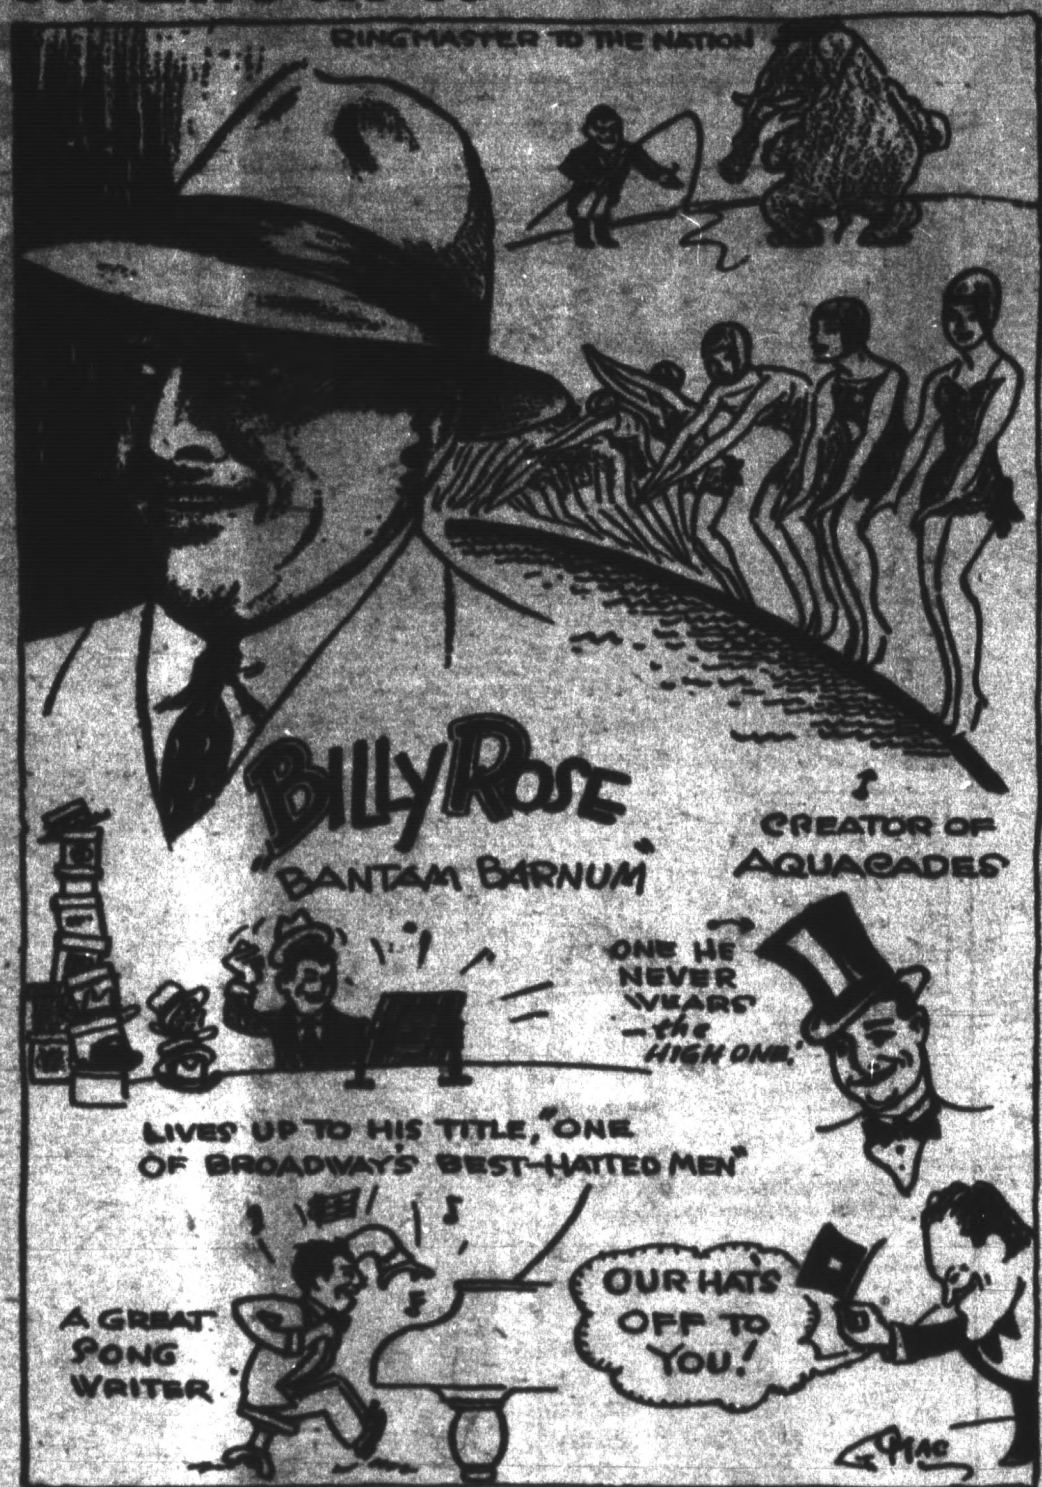

More than half the value of U. S. imports of agricultural products is in noncompetitive items like coffee, tea, cocoa, raw silk, rubber, bananas, spices.

Typewriter Ribbons

Typewriter ribbons are usually made of the best quality nainsook, closely woven of fine, even thread spun from the best long-fiber Sea Island cotton.

OUR HAT'S OFF TO—

by MacConachie

Co-operative Marketing

Co-operative farm marketing and purchasing associations are doing a gross business of \$2,750,000,000 annually.

Broad Poultry Market

The American poultry farmer's best customer is the Great Atlantic & Pacific Tea company, which last year reported purchases of 40,000,000 pounds of chicken and 95,000,000 dozen eggs, equal to two-thirds of a dozen for each man, woman and child in the country.

Fish Poisoning

One of the symptoms of fish poisoning in a human being is the reversed sensory impressions received when contacting cold objects, says Collier's. A cool metal railing feels warm to the hand, while ice cream feels so hot to the mouth that the eater instinctively blows upon it.

Largest Quicksand Area

Diamond shoals, off Cape Hatteras, N. C., are said to comprise the largest area of quicksand in the world.

THE RECORD SNAPSHOTS

John L. Collier, president of The B. F. Goodrich Company, with three employees who completed 40 years of continuous employment this month. Goodrich has 2700 people with 20 or more years of service. Left to right: Mr. Collier, William Tolley, Oscar Le Masters and Earl Hanna.

Proud Papa—His Royal Highness Shmee is showing unusual tolerance for his young pedigreed Siamese offspring.

All-Night Service Aide Star—All-night service recently instituted by Texaco dealers along national highways is an invaluable aid to actress Maxine Jennings and other motorists who find 24 hour availability of registered rest rooms, telephones and auto accessories the answer to a long pressing motoring need.

Quebec's Iroquois Indian Fishing "Champ"—Ste Marguerite, Quebec—Pretty 16-year-old Dorothy Beauvais, daughter of an Iroquois Indian guide, ranks as Quebec's finest fresh water angler. Quebec boasts the finest trout fishing in Canada.

Between Fred Allen (left) and Bud Abbott (right) there doesn't look as if there will be much of Lou Costello left to work in Allen's Wednesday night spot on NBC starting July 3. While Fred is making a picture with Jack Benny in Hollywood, Abbott and Costello, late of the Kate Smith Hour, are breaking out with the first program all their own.

Canadian Sport Fishing
Remarkable progress in the development and extension of sport fishing areas in the national parks of Canada is reported by the department of mines and resources, Ottawa, which administers Canada's system of national parks. As a result of biological surveys and subsequent stocking operations in the various lakes and streams, particularly waters once barren of fish, visiting anglers may now enjoy good fishing in many waters where previously there was little or no fishing available. One of the outstanding achievements has been the successful introduction of the speckled trout from its native haunts in eastern Canada into many of the clear, cold waters of the national parks in the Rockies.

Nazi Nine Commandments
The new commandments which have been substituted by the Nazi government in place of the Ten Commandments are as follows: 1. Honor the Deity, the world foundation. 2. Honor thy ancestors and grandchildren. 3. Honor the great of thy people. 4. Honor thy parents. 5. Keep yourself clean. 6. Be loyal to your people. 7. Do not steal. 8. Be truthful. 9. Help the noble.

Japanese Claim Inventions
Japanese claim to have invented virtually all the new machines of the last 50 years, including the airplane, the glider, the submarine, and the gyroscope.

Early School Superintendents
In 1857 Buffalo, N. Y., and Louisville, Ky., each established the position of city superintendent of schools.

Poodle's Moniker
A small poodle probably has the longest and most cryptic name of any dog in Boston. A woman brought the pup into a police station to get a license for "Joy Barker-Snozzle Drop-Kelley."

Braille Invention
When he was three years old, Louis Braille inventor of the Braille system, became blind. At 10 he went to a Paris institution for blind foundlings. At 19 he began teaching the blind.

Pure Science Now Put to Practical Use

Looking to the future the world of useful arts is now coming to deal in values heretofore reserved to "pure science". Industry in applying science to practical things is stepping beyond the range of human perceptions—beyond the gifts of sight and hearing, of touch and taste and smell. The pictures above, made in Chrysler Corporation's recently opened new engineering and research laboratories, show how science and industry work together today. In the upper left hand corner an artist works on designs for a new car; in the upper right are pictured some of the

500 white-coated individuals who, calmly and efficiently, in these hospital-like laboratories, either carry out the designs of the artist or continue research to make available to him new ideas and materials from which he can design at another time; picture No. 3 shows a wind tunnel where engineers study wind resistance, streamlining, aerodynamics, and other factors important to the movement of solid bodies through space; picture No. 4 shows a huge machine which reproduces in the laboratory practically any desired road condition for hydraulic brake testing; in No. 5 the X-ray

camera is used to tell the engineer the exact atomic structure of materials so that he may judge as to their usability; in No. 6 experiments are carried on with single cylinder engines as a basis for the development of new and better motors. In No. 7 intricate apparatus analyzes samples of gas taken from a carburizing furnace cause the toughness of metal so it depends upon an accurate balance of these gases; in No. 8 the spectroscopic is used to ascertain the exact number and volume of elements in any alloy so that the engineer may be able to know how to improve it.

Aerial Sleeve Target
A new type of aerial sleeve target for anti-aircraft firing practice is being developed by army officers. Rubber compartments containing titanium tetrachloride enable gunners to record direct hits immediately. When struck, the new target emits a dense column of smoke.

Underground Hospital
An underground hospital, at Ramsgate, England, the first in that country, is being dug out of rock chalk 90 feet below ground, immediately below the present Ramsgate general hospital. It will include a general ward 559 feet long, containing 300 beds.

Ivy's Symbol
The ivy has always been a symbol of the clinging love of woman. The altar of Hymen, the Greek god of marriage, whose blessing was invoked at every wedding, was kept green with ivy. In the legend of Tristan and Isolde, two ivy vines, entwining, are a symbol of the undying union of the lovers.

Towers of Silence
The tower of silence is the name applied to structures built by the Parsees for the disposal of their dead. They are towers about 40 feet high called dakhmas. Below the top of the wall is built a floor of iron grating and upon this the bodies are placed until by exposure to the elements and birds of prey the flesh is entirely removed from the bones and they fall into a pit below.

Weight of Comma
Scales balanced to weigh the ink in a comma are finding wide use in modern laboratories. A grain of sugar is considered massive on the microchemical balance. It weighs 68-1,000,000ths of an ounce.

Ozone Thwarted
The destructive action of invisible ozone discharges which consume ordinary electrical transmission wires in three seconds has been resisted for three years by wires insulated with Koroseal, new synthetic elastic. In tests conducted by E. F. Goodrich company scientists at Akron, Ohio, laboratories.

Cleveland Relief Measure
Cleveland relief authorities have ordered the impounding of license plates of relief clients and members of their families who own automobiles. "If these people want to own and operate cars," City Relief Commissioner Frank G. Jones said, "they will get themselves cut off relief rolls."

Francis Bacon's Hobby
Francis Bacon, the essayist, spent his spare time devising new styles in men's clothes. He made 1,200 drawings of freakish raiment and had tailors make some of them up. When no friends of his would wear any of the wild and giddy costumes, he hired men to put them on and promenade the London streets.

Television 'Make-Up'
Actors' make-up has changed constantly since the inception of television. About 1930 the actors painted their faces white and their lips black, but the present make-up is very similar to that used in the movies.

New Copper Discoveries
New discoveries of copper ore 150 miles southeast of Yellowknife, Alberta, flourishing subarctic mining camp, have been reported. They are expected to give added importance to the northern mineral fields, particularly in view of the war demand for basic minerals.

'Youthful' House Paint
Home owners faced with the problem of making old houses look younger may try coloring them with "youthful" paints. This can be done with almost any type of construction. Side walls of wood, brick, or stucco may be painted with paints specially prepared for each surface. Roofs may be covered with one of several different types of factory-colored shingles, and color accents may be provided in window blinds and front doors. A popular new exterior color combination consists of light salmon-colored walls, emerald-green roof, and a flame-colored front door.

Weatherbeaten Woodwork
A method by which an old weatherbeaten effect can be achieved on new knotty pine woodwork has been devised by paint authorities. Paint experts advise the sponging of the surface with a fairly strong solution of ammonia or soda. If a dark finish is desired, make a stain of raw umber thinned with turpentine and add enough varnish to bind it. Prepared varnish stains are available for this purpose if preferred. A thin coat of reduced shellac or dull varnish may then be applied, followed by a coating of wax.

Men Surpass Women?
The male of the human species is superior in intelligence to the female, according to Professor William Reuter, Westminster college psychologist. Reuter asserts, on the basis of tests, that it has been proved that woman rarely becomes successful through her own ability. Men have always beaten women in every field, even in their own domain of cooking and dressmaking, according to Reuter. He said the difference in innate intelligence between the sexes may be due to the fact that the masculine brain is larger.

Mahogany's Scientific Name
The scientific name for mahogany is "Swietenia." This name was given it by Nicholas Jaquin of Leyden, who was sent to the West Indies by Francis I. of Austria, to study the flora of that region. The name honors Gerard van Swieten, botanist and physician, also of Leyden.

Doubles in Mirrors
The balcony of the Forum restaurant, which opened recently in Chicago, is designed as half a room, but diners feel that they are in a whole room twice as large. The room is "completed" by reflection from a huge plate glass mirror which covers one wall. The lighting fixture is a half-circle of plate glass, also "completed" by the mirror.

Even Christmas Simpler
Christmas tree decorations in Canadian homes will be simpler this year because of the war. Unless merchants can refill demands from stocks, ornaments will not be available. Most of them are made in Germany.

For informal summer evenings is this dirndl-type hooded gown of silk print with contrasting blouse, as worn by lovely Maxine Roscoe, CBS radio starlet. A cool touch is the necklace and bracelet set of "icicle" jewelry, created by Lisanda. The latter is obtainable in a variety of shapes.

U. S. Foreign Trade
America's exports of finished goods have increased fourfold since 1853, while exports of crude materials have been at 71 per cent, a compilation by the New York Journal of Commerce shows. At the same time imports of finished goods dropped 64 per cent, and imports of crude materials increased 4 1/2 times.

Buzzard Migration
The annual southward migration of buzzards was so great through San Geronimo pass in California this year that the birds blacked out the sky. More than 4,000 of the birds were estimated to have made the mass flight south through the pass.

'Dressing-up' Onion
Farm experts are "dressing up" Louisiana's Creole onion by inbreeding and selection to improve its yield, quality and market value.

LEE JIMMY JOE

"Primrose Path" Now Playing At D. C. Theatre

Bringing Ginger Rogers and Joel McCrea together again on the screen "Primrose Path," at the Daly City theatre now, proves itself one of the season's most compelling dramas and a vehicle revealing new facets of the Rogers talent.

Producer-director Gregory La Cava, who made the memorable "Stage Dood" and "Fifth Avenue Girl" with Ginger, hits a third cinematic home run in this appealing story of a friendless outcast and her stormy romance with a wise-cracking and impetuous young man who runs a lunch counter down by the fish canneries.

The girl, ashamed of her disreputable family, encounters the boy and falls in love with him.

They get married without the boy learning the truth about the girl's parents, but after the first months of marital happiness an incident convinces the girl that she had better bring them together and get it over with.

She does so, with fiery results, for the boy is utterly disgusted with his in-laws, and he orders the girl to go away and never come back. The complications that ensue, and their outcome as the two young people battle their pride and their resentment, make for the power of this genuinely unusual offering.

In her difficult role—a role that calls for exceptional sympathy and shading and dramatic talent—Ginger Rogers gives one of the best performances of her whole career, while McCrea does a splendid matching job.

Companion feature is "Dr. Kildare's Strange Case," starring Lew Ayres and Lionel Barrymore.

GINGER'S BEDECKED FOR A PROPOSAL

This may be her first date, but Ginger Rogers is making certain it will be her first and only proposal by donning her mother's (Marjorie Rambeau) best finery. Ginger's dressing for Joel McCrea, with whom she is co-starred in "Primrose Path," RKO Radio's adaptation of the Broadway smash, now playing at the Daly City theatre.

Discovery of Tangier

In June, 1608, during his exploration of the Chesapeake bay and the Eastern shore, Capt. John Smith discovered Tangier Island and named it after the seaport in Morocco.

Good Neighbor Policy

Louisiana State university plans to offer special agricultural courses for boys from Latin American countries.

North Carolina Cigarettes

Of the 160 billion cigarettes manufactured annually in the United States, approximately 86 billions are produced in North Carolina.

Canada's War Steps

Registration of women for war service, if the need arises, is in progress at 60 polls throughout the province of Manitoba, Canada.

British White Paper

The official reports or communiques issued by the British government periodically are known as Blue Books. Occasional reports, which usually are not so extensive, are called White Papers.

Elephant on Diet

Waddy, 76-year-old elephant at Franklin park zoo, Boston, is on a diet. Her present limited menu of beets and carrots was selected because Waddy has only two teeth left.

No Local Tax Levy

Milton, Wash., has adopted a budget for the next year that contains no local tax levies. The town will operate on liquor and highway funds allocated by the state.

Depth Bomb Invention

The depth bomb, terror of submarines, was invented in 1903 by W. T. Unge, of Sweden.

U. S. Farm Imports

U. S. imports of agricultural products, except forest products and distilled liquors, have averaged \$1,582,000,000 annually for the past 15 years.

Temporary Lay-Off

The sign on a Louisville church lawn didn't mean members of the flock were weary of well-doing, but it actually read: "No Christian Endeavor until November 15."

New Age 'Calculator'

According to Collier's, anyone whose calendar age is between 10 and 45 years may now have his physiological age determined quite accurately through a mathematical formula based on the rate of the healing of a superficial wound.

Freak Hunting Death

Harold Strain, Gold Beach, Ore., 16-year-old hunter, was killed by a bullet that had passed through and killed a deer. Strain was standing in the line of fire when his hunting partner, not knowing he was there, fired the fatal shot.

Sunken Treasure

Still in the wreck of the Fannie & Jennie, Confederate blockade runner lying off the beach at Wrightsville, N. C., is a gold and jeweled sword sent to General Robert E. Lee by British sympathizers.

Giant Electric Shovel

A giant electric shovel, which will be able to dig through earth as deep as a six-story building, wide as a four-lane highway and deposit it 226 feet away, is under construction at Marion, Ohio. It will be used in strip mining work in Indiana coal fields.

'Self-Made' Farmer

Charles McCartney, a farmer near Sigourney, Iowa, uses only articles of his own making. He built his own house, furniture, barn and plow. He and his family wear only goat-skin clothing, which he makes himself.

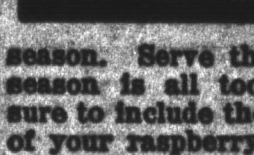

Carnegie Libraries

Andrew Carnegie established 2,811 libraries throughout the world. In this country he gave 1,946 libraries.

A Flavor All Their Own

By Frances Lee Barton

RASPBERRIES have a flavor all their own. Try to explain what a raspberry tastes like and you'll see what I mean. As this distinct flavor is extremely popular with most people, you will never go amiss by serving a raspberry dish when these berries are in season. Serve them often, for the season is all too short. And be sure to include the following as one of your raspberry presentations:

Frozen Raspberry Dessert

4 cups raspberries; ¼ cup sugar; ¼ cup water; 1 cup canned pineapple juice; 1 package raspberry-flavored gelatin; 1½ cups cream, whipped.

Crush 2 cups raspberries, add ¼ cup sugar and water, let stand 10 minutes, then force through sieve. Combine 1 cup of this raspberry juice with pineapple juice and heat. Dissolve gelatin in hot juices. Chill. When cold and syrupy, place in bowl of cracked ice or ice water and whip with rotary egg beater until fluffy and thick like whipped cream. To remaining 2 cups raspberries, add ¼ cup sugar and let stand 10 minutes (do not crush). Fold into whipped gelatin, then fold in whipped cream. Turn into freezing trays of automatic refrigerator and let stand 8 to 4 hours, or until frozen. Or turn into 2-quart container, cover with waxed paper, press cover tightly down over paper, and pack in equal parts ice and salt for 8 to 4 hours. Makes 2 quarts.

Tough Montana Hombre

When an unknown but tough "hombre" dropped a nickel in the telephone of a drug store at Butte, Mont., and got the wrong number, he promptly drew out his six-shooter and blasted away at the mouthpiece.

Aviation Employment Up

As the result of sharp increases in both foreign and domestic airplane orders, California's aviation industry is employing 60 per cent more men than a year ago.
